

Hi –Thanks for the Email regarding the Telephone Privacy Action & FCC.
Sent this note several times and kept getting “error” messages from the FCC.
Looks like their system is broken in more ways then one!
Wanted you to have a copy!
Thanks for a great law –we finally have peace in our home at dinner-time!

RE: FCC "Do Not Call" Ruling
(Preempting state Telephone Privacy laws in favor of a national standard)

Commenting on Proposed Ruling:

While I understand that business would prefer a "watered" down
National standard -it would not be in our or other citizen's best interest to
loose what has become (for our family) the best piece of legislation in Indiana
for some time.

We have been very impressed with how complete and effective the Telephone Privacy
Action has "STOPPED" calls.
Up until this action took place -we felt that our phone was being used against us.
Telephone Privacy has truly returned to our home! We had been receiving up to (6) calls
a night and some quite late -after 9:30/10pm. My Spouse teaches school (1st) Grade and
I run a private business, we rise at 4:30 am to exercise and start the day, so a late phone
call is disruptive at best.

The bottom-line is the Indiana Telephone Privacy Act is working.
Please leave Indiana's law alone....
If you must write a National Standard -write it as a "at least"
law, so it would ride on top of Indiana's existing law.

We do not want nor would we welcome unwanted phone calls!

If you really feel like solving a big problem -please do something
about the all Email "SPAM" we receive at work and home...instead!

Appreciate the opportunity to comment!
